

## What's Driving the RADV Surge - and Why It Matters Now

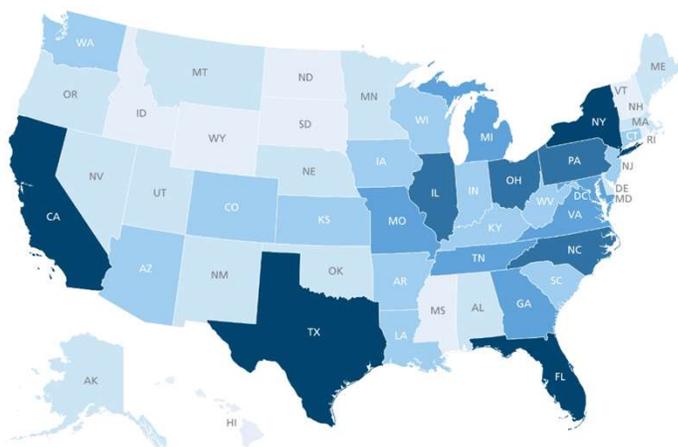

The Centers for Medicare & Medicaid Services (CMS) is dramatically accelerating Risk Adjustment Data Validation (RADV) audits after an eight-year lull, with all audits from 2018 through 2024 slated for completion by early next year. This includes:

- 900% increase in audit volume
- Expanded record sampling (from 35 to 200)
- New rules allowing CMS to recoup overpayments across entire member populations

The implications are significant. Failure to validate diagnosis data can lead to severe financial penalties, false claims exposure, and program exclusion.

## Why Verisma - RADV Expertise and Provider Trust

- **23 Years of Experience:** supporting medical records departments across 50 states covering release of information, data storage, referrals, and record retrieval.
- **20,000+ Client Sites Served:** expertise with every major EMR system.
- **No Project Size Limitations:** we apply the same rigorous process for every request.
- **RADV, Risk Adjustment, and Quality Experts:** trained staff available and ready to help.
- **Data Warehouse:** some clients store their 2018 dates of service data with Verisma, allowing for easy access and rapid turnaround on complete RADV files.

Verisma Client Locations
